

## **i** SOPHAS - PROFESSIONAL ACTUARIAL SYSTEM YOU CAN AFFORD

We understand your job!

**The decision about new actuarial modeling tool has never been such important. Fast changing situation on financial markets and the impact of on-coming Solvency II Directive are main reasons why it is the right time to start using a quality modeling system.**

**Time and again, we see that we can offer cost less actuarial tool with great transparency than our competitors – and a large number of organizations also agree with us.**

The Sophas system is an actuarial system designed especially for quick processing of cash flow models. The system is very universal and fast in calculations. It is also easy to learn it and make adaptations in the model and it offers lots of various outputs, including different scenarios and grouping. Output files can be opened for analysis e.g. in Microsoft Excel. The system has archive functionality (the model runs are audit-able). It is very flexible; every model is "made-to-measure" to the client. Software updates and licensing can be supported over a web-based service. For more details about the Sophas system please see [www.sophas.eu](http://www.sophas.eu) and [www.tools4f.com](http://www.tools4f.com).
